EDUCATION

IT Diploma, *Cairo—Route Academy.*

March2020 - July2020

I have learned in this diploma the basics of programming using one Of the most popular programming languages in the world c++ and I have learned Object Oriented Programming (OOP), Data Structure, Algorithms.

Web Development Diploma, *Cairo—Route Academy.*

September 2020 - Jan2021

I have learned in this diploma HTML, CSS, JavaScript, Bootstrap, JQuery, SASS, TypeScript, Angular, and learned how to work with Back-End APIs, handling errors, getting data, etc.
I have learned in the back-end how to make API's and how to work with data bases and validation with joi and authorizatoin and authenticatoin

FreeCodeCamp

I have learned from this site more about HTML,CSS and Responsive Web Design in my first certification and I have learned JavaScript Algorithms and Data Structures also

Udacity

I have graduated from Udacity in Front End Web Development Professional track

Al Azhar University, Cairo— *majoring in accounting*

Learning about accounting, economics, marketing

EXPERIENCE

Golden-Pizza Project (Angular + node.js)

This project is a dashboard project and this project took from me around (500 hours) I have used nodeJS and Angular to create this project and it has the following featuers:

- Dashboard for the users, admins
- Admin can add, delete, update product on dashbord
- Admin can find user and block user and get user data
- Login, regesteration and authorization
- API for getting all the product from database and return them to the client
- Api for each section separately
- If you want details about the project please read (read me) file.

TECHNICAL SKILLS

- C++, OOP ,Data Structure.
- HTML, CSS, JavaScript
- Bootstrap, JQuery ,SASS
- TypeScript, Angular
- Node.js, express.js
- mongodb,SQL

PERSONAL SKILLS

- Hard Worker.
- Very Fast Learner.
- Very good team worker.
- Work Under Pressure.
- good communication skills in English.

CERTIFICATIONS

A certificate from Udacity and the Egyptian Government on finishing the Front-End Professional Track

Two Certificates from freecodecamp.org finishing Responsive Web Design and JavaScript Algorithms and Data Structure

IT Diploma , Full Stack Diploma from Route Academy

- Front Code https://github.com/hassankordi/golden-pizza-front
- Back Code https://github.com/hassankordi/golden-pizza-back
- Project Link https://golden-pizza-hk.netlify.app/
- Quick access on admin dashboard please log in with

  Email: admin@gmail.com

  Pass: 123

  Maybe you will find a problem with the project host because it's on a free host

Authentication Project (Angular + API)

This project is dynamic and responsive it finds popular, trending, coming soon, top-rated movies dynamically, It has many pages

- The first page is for login by your mail & password
- If you didn't have an account yet, you can click on register and make your own account
- After login, you can sort movies by top-rated, popular, etc.
- If you want details about a specific movie you can just click on it.
- Code => https://github.com/hassankordi/moviesAuthenticated
- Link =>https://authentication-hk.netlify.app/
- Quick access on the project
  Email: hassanhilal28@yahoo.com
  Pass: 123

Movies Project (Angular + APIs)

This project is dynamic and responsive it finds popular, trending, coming soon, top-rated movies dynamically, It has pagination

- The first page is for playing-now movies and you can switch to popular,
  Trending, top-rated, upcoming open the sidebar in the left
- You can search about any movie in the search bar
- There is a section for contacting us and I used validation on it
- There is a pagination bar to get more movies in the same category
- If you want any details for any movie just hover on it
- code=> https://github.com/hassankordi/movies-HK
- Link => https://movie-hk.netlify.app/

Restaurant Project (API)

This project is dynamic and responsive it's found Pizza, Pasta, Steak, Chips, Fries, Corn, Salad, Tomato dynamically, I used AJAX call to make it easy to get any categories by clicking on it in the navbar

- The first page is for pizza by default
- If you want the ingredient for any meal you can click on the meal
- This is a responsive project
- Code =>https://github.com/hassankordi/restaurant
- Link => https://restaurant-hk.netlify.app/
